Getting Started with Bloomberg

- The Bloomberg Station is a stand-alone two-panel set-up in the public computing area.
- Username and Password are provided next to the computer. If you need assistance logging in, please ask the computer operator's desk for assistance.
- Hit the RED key called CONN DFLT to LOGIN
- Type the username and password provided and hit Green key <GO>

The computer also has Internet Explorer, and the complete Microsoft Office suite. Just roll the cursor at the bottom of the screen and you should see Window's Start Menu show up. Bloomberg otherwise dominates the screen.

After Logging in, what?

- At the flashing cursor at the top, type any word that you think is a financial concept, security, or a business entity (equity, Microsoft, etc). The auto-complete features start giving you options
- If you find a perfect match, click on the option
- If you do not know what to do, see the next section on Help features

Help Features on the Bloomberg Terminal

I. Type the keyword followed by the <HELP> key

Example: CREDIT RATING <HELP>

The help key works like a search engine. It provides definitions, FAQ and direct access to Bloomberg functions

II. Chat with 24/7 Live Help

Hitting <HELP> <HELP> brings up the chat room to send a message to Bloomberg support and ask your question.

III. At any data screen hit the <HELP> key to invoke detailed help on the specific function

Example: Let's say you are looking for information about mergers and acquisitions

- Type Merger at the cursor and Bloomberg auto complete feature will provide some options
- Choose Option MA Merger and Acquisition Search
- To learn more about Mergers & Acquisition Search, click on **<HELP> for explanation**

Cornell University Albert R. Mann Library

The Keyboard

Apart from the regular keyboard functions, Bloomberg works with shortcuts & mnemonics. Please refer to the [handout](#) that describes the keyboard.

RED KEYS

<CONN DFLT> Hit this key to be prompted for login information.

<CANCEL> Does not log you out if you hit it once - instead takes you to the Bloomberg support numbers.

GREEN KEYS

Green keys are action keys. You do not have to hit anything else. They tell Bloomberg that a request has been made.

<GO> works like the 'enter key' - Hit it to activate any function.

<NEWS> brings up the headlines that are archived indefinitely.

<MENU> takes you to the **MAIN** menu or returns to previous menus that you were viewing. It works like a "back" button.

YELLOW KEYS

Yellow Keys define the markets. Every financial instrument or index in Bloomberg is accessed by using a ticker symbol and followed by a yellow market sector key (e.g., MSFT **<EQUITY>**)

Downloading: BBXL <GO>

Mann Library has an academic license that permits downloading. This is not within the scope of the introductory workshop. If you need directions, please contact instructor or go to the function BBXL <GO> to learn more. You can also download print, email images of most of the screens, which will be covered in the session. Any topic that is grayed out is not available in the academic version.

Export Options

If it is possible to download, then the "Export" tab at the top of the screen will contain active links to "Print Screen" and "Grab screen." If the options under Export are grayed out, then you will not be able to print/send the screenshot. This is often the case for top level menus for market sectors. The GREEN Print button on the keyboard also sends the screenshot to the printer.

Grab Screen:

- Alternatively, type GRAB at the cursor and hit <GO>.
- This prompts you to enter your email address. Hit <GO>
- Enter the subject line. Hit <GO>
- You will see the various options at the top. If you are ready to send, then type 1 <GO>

Cornell University Albert R. Mann Library

Creating your own login

1. At the Bloomberg terminal, do not login with the public login.
2. Create your own login by hitting <GO> at the login screen
3. Fill out the form to create your own login
4. Keep your cell phone handy. You will need to provide a number that a Bloomberg representative can either SMS or call you back. If you do not have a cell phone, then borrow the cordless phone from the computer operator's desk. The number is 607-255-3240. Provide this number on the form.
5. Once you have submitted the form, you will receive a call or SMS within 5-10 minutes.
6. Login with your newly created login information.
7. The Bloomberg representative will send a confirmation number which you will see on the Bloomberg screen. You will need to read this number off to the representative.
8. And you are all set!

Bloomberg Essentials Training Program

Use your own personal login to complete the training program. Type the words Bloomberg Essentials or **BESS <GO>**. Bloomberg permits all academic users to gain essential training on-line and there is no fee for this training program. The important features of this process are:

1. A total of 8 modules are available through the BESS menu.
2. Core Videos consist of Getting Started, Bloomberg News, Market Monitors & Launchpad and API (Excel)
3. Market Sector Videos consist of introduction to Equity, Fixed Income, FX and Commodity
4. You can test your knowledge by taking the core exam (covers all 4 core videos) along with any of the market sector exams
5. You need to complete with a 75% grade or better to earn the Acknowledgement of Completion
6. Re-takes of tests are not provided, so you get only one chance to pass the test.
7. The certification can be completed at your own pace. You would watch video tutorials and practice as much as needed.
8. Each video also has an accompanying handout with a specific document number. The video tutorial page provides you the directions to obtain the documents.
9. You are strongly encouraged to take the time you need to explore the system and practice before taking the test.
10. When you are ready, just click on Exams Enablement and contact the Help Desk. You can also hit the green help key twice to access a Bloomberg representative.
11. You can budget for 6-8 hours for completion of the entire essentials program

BLOOMBERG CHEAT SHEET I

Select Bloomberg Functions & Definitions for:

Equity Idea Generation & Portfolio Functions

| | | |
|---|--|--|
| <p>MA <GO> Displays current and historical merger and acquisition (M&A) details for public & private transactions.
